

and the effects of noise

Measurement data is converted to an analog signal for output before being converted back into data by the logger. In this setup, there are two D/A and A/D conversions.

### **Features**

# Easy scaling

The setup process is simple: just search for and pair LR8410 Link-compatible products. Since the settings on paired devices are automatically received by the LR8410, there's no need to manually configure troublesome scaling settings. And since this process occurs wirelessly, you spend less time on wiring work.

# Simultaneous measurement of power, temperature, and other data

The LR8410 can be used with a broad range of modules and LR8410 Linkcompatible products. Since you can pair it with up to seven devices, you can measure a large number of channels and parameters along with power meter

In addition, the LR8410 provides other useful functionality such as waveform calculation and alarms

## **Applications** Environmental temperature measurement anomaly measureme LR8510 🦭 LR8514 No wires required POWER QUALITY Bluetooth serial WIRELESS LOGGING STATION ANALYZER PQ3100

Connect the PQ3100 and the LR8410 via Bluetooth® wireless technology to transmit up to 6 kinds of measured values to the LR8410, letting you record PQ3100 values in addition to other logger data.

# Pairing LR8410 Link-compatible products -PW6001, PW3390, PW3335, PQ3100-

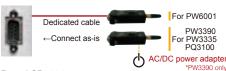

## Connect a Bluetooth serial adapter to the product.

Turn off the product before connecting the adapter

Connect the adapter to the RS-232C terminal on the LR8410 Bluetooth serial adapter

Recommended model: Parani-SD1000

Parani-SD1000 setup

Set the DIP switches based on the communication speed of the LR8410 Link-compatible product and turn on the power switch.

Configure the LR8410 Linkcompatible product's communications settings

Example PW6001 screen

Select "Bluetooth" under the LR8410 Link-compatible product's RS-232C settings, set the communication speed, and choose "Initialize Adapter." Then configure the product's settings as necessary.

Pair the LR8410 Link-compatible product with the LR8410 and start measurement. The paired product's settings will be automatically received by the LR8410 after pairing.

Logging Multi-point Data Has Never Been So Easy with a Wireless Data Logger max.105 ch

Model No. (Order Code)

LR8410-20

The LR8410-20 alone is not capable of making measurements. One or more input modules are necessary to measure.

For more detailed information, please refer to the individual product catalogs.

# Measurement unit: Pair up to 7 units (models can be mixed)

LR8410 Link-compatible products \*Contact HIOKI for more information. A Bluetooth serial adapter (purchased separately: recommended model: Parani-SD1000) is required

**POWER ANALYZER** PW6001

A dedicated conne urchased separately) is quired

**POWER ANALYZER** PW3390

An AC/DC power supply adapter (purchased separately; recommended model: OPA-CO1) is required.

PW3335 The PW335-01 is not supported.
