RiSH PQA is a compact state of art power quality analyzer designed for utilities, as well as for industrial & commercial customers.

The meter is equipped with 5" TFT Colour display for easy graphical representation of Harmonics, Phasors and Waveforms.

RiSH PQA can continuously monitor power quality in accordance with EN50160, also the built in flexibility allows the user to set customized setting to do power quality analysis.

The meter is capable of measuring harmonics as per IEC 61000-4-7, inter-harmonics, dips, swells, interruptions.

Intelligent algorithm allows user to monitor multiple parameters at a glance on a single screen, which helps in analyzing power quality issues very easily.

The Power Quality Analyzer also monitors demand and measures energy with accuracy of class 0.2S as per IEC62053-22.

The meter supports memory card (microSD, up to 8GB) for recording of events and power quality parameters as per EN50160. Communication can be done via modbus over RS485.

RiSH PQA is supported with Power Configurator application software for configuring and displaying data via RS 485. USB should be used to download data on PC and for firmware upgrade process.

Areas of Applications:

- Monitoring of all power quality parameters for early warnings & corrective actions
- Power quality report generation as per EN 50160
- Fault analysis in case of power failure
- Disturbance analysis
- Supervision and preventive maintenance of an installation
- Load trend analysis

Understanding EN50160:

RiSH PQA measurement as per EN50160:

- Voltage Swell & Dip Detection.
- Voltage Variation Detection.
- Detection of Voltage Interruptions.
- Unbalance Detection & Measurements.
- Frequency Variation Measurement.
- Per Phase Individual Harmonic Measurement as per IEC 61000-4-7 up to 63rd harmonic, Group and Sub-Group Harmonics Measurement
- Individual, Group and Sub-Group Inter-Harmonics Detection & Measurement.
- Thresholds as per EN50160 or user selectable thresholds.
- %THD of per Phase Voltage & Current.
- Measurement of RMS Value of Harmonics.
- Time Stamping for Power Quality Disturbances.

Product Features:

- Measures all basic electrical parameters like Voltage, Current, Power, Demand and Energy.
- Energy Class 0.2S as per IEC 62053-22
- Measurement in all Four Quadrants
- 5" TFT Display with 480x272 pixels resolution

Meter:

- **Basic**
 - TRMS Voltage & Current Measurement over 10 cycles for 50Hz and 12 cycles for 60Hz
 - Crest Factor and Earth to Neutral Voltage (EN) Measurement
- **Distortion**
 - % THD & % TID Measurement of per Phase Voltage & Current
 - Shows Voltage and Current amplitudes of 4 user-settable frequencies
 - Signed & Unsigned Power Measurement
- **Unbalance**
 - Shows %Unbalance of Voltage and Current
 - Shows %Imbalance of Voltage and Current
- **System**
 - All system related parameters are displayed
 - Shows Minimum and Maximum System Voltage and System current
- **Power/Energy**
 - Active ,Reactive & Apparent Power and Energy Measurement
 - Independent Import & Export Energy Counter
- **Demand**
 - Active, Reactive, Apparent demand, Current demand measurement
 - User selectable demand interval

Scope:

- Real Time Representations of Three Phase Voltage and Current Waveform.
- Cursor for easy analysis.
- User configurable colors for each channel.

Phasor Diagram

- Complete Three Phase System overview at a glance for System analysis (Phasor Diagram).
- Display of per Phase Vrms & Irms.
- Phase Angle of all Phases.
- User configurable colors for each channel.

Harmonics:

- Harmonics measurement as per IEC 61000-4-7 Class II
- Per Phase Voltage, Current & Power Bar Graph Representation of up to 63rd Harmonic.
- List of Harmonic Components with magnitude & scaled to percentage of fundamental component.
- Inter-Harmonic Component representation.
- Odd, Even, Total THD as well as TID.
- Zoom function for easy analysis of each Harmonic Component.

Record:

- Recording of parameters as per EN50160 or as per user defined thresholds.
- Time Based recording offers automatic start & stop of recording without manual intervention.
- Comprehensive Setup Summary view to display thresholds & setting set for recording.
- Unique recording mode allows user to select recording mode as per user application.

Events:

- Display & Analysis of recorded events like Dips, Swells & Interruptions.
- Waveform details at each specific Event.
- Display of Rms Values of Voltage & Current at recorded Events.

Trend:

- Graphical Trend Representation of parameters.
- Display of Values with Time Stamp.
- Zoom Function.

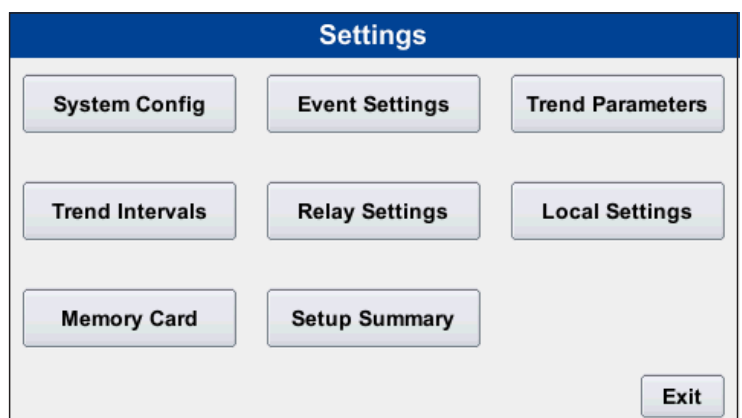

Report:

- Automatic Report Generation as per EN50160 thresholds or user defined thresholds.
- Graphical View of EN50160 report for easy analysis.
- User Configurable Status Window.
- Color coded representation of configured parameter to locate the source and pin point root cause of Power Quality disturbance.

Settings:

- System Config is used to select Wiring configuration, CT / PT values & Recording mode as per user need.
- Event threshold allows user to set thresholds for RMS faults.
- Trend Parameter, relay, communication setting.
- Setup Summary give details about **RiSH** PQA i.e. Model No, Wiring, CT/PT etc.
